PROFESSIONAL EXPERIENCE

Python Developer — Double9 Books Oct 2026 – Present

- Architecting scalable backend automation pipelines and **RESTful APIs** using **Python & FastAPI**, automating publishing workflows, content ingestion, and catalog indexing.
- Building asynchronous distributed workers with **Celery & Redis** message queues for batch asset conversion and automated parsing, cutting operational processing time by **45%**.
- Designing and optimizing relational database schemas in **PostgreSQL & MySQL**; leveraging **Redis caching** to optimize query latency and enhance throughput under load.
- Containerizing microservices using **Docker** and deploying automated **CI/CD** workflows via **GitHub Actions** to cloud infrastructure on **AWS**.
- Enforcing **SOLID principles, OOP design patterns**, clean code architecture, and automated testing with **PyTest** to ensure high reliability and 85%+ test coverage.

Python Developer Intern — AiBridze Apr 2026 – Sep 2026

- Engineered modular backend services and **REST APIs** in **Python and FastAPI**, connecting AI conversational models to application data layers with **MongoDB**.
- Developed Python automation scripts for data extraction and recurring ETL pipelines, reducing manual task overhead by **35%**.
- Collaborated in an **Agile/Scrum** team — conducted API contract testing via **Postman**, peer code reviews, and version control using **Git and GitHub**.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3
Backend & Automation: FastAPI, Django, Node.js, Express.js, RESTful APIs, Celery, Asynchronous Architecture, Batch Pipelines
Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, Database Schema Design, Query Optimization
DevOps & Cloud: AWS, Docker, CI/CD, GitHub Actions, Linux, Git, Postman, Vercel
Core CS & Software Engineering: Data Structures & Algorithms, System Design, LLD, HLD, OOP, SOLID Principles, Design Patterns, Clean Code
Testing & Security: PyTest, Unit Testing, Integration Testing, JWT Authentication, API Security

PROJECTS

JobTrackr — *MERN Stack, JWT Auth, REST APIs* | GitHub • Live Demo

- Architected and built a production-ready **MERN** application (React, Node.js/Express, MongoDB) with **JWT authentication**, a drag-and-drop Kanban pipeline, and full **CRUD REST APIs** for end-to-end job-application tracking.
- Built a real-time analytics dashboard to track interview/offer rates across applications; deployed on **Vercel, Render**, and **MongoDB Atlas**.

AI Code Reviewer — *FastAPI, React, Google Gemini API, Python* | GitHub • Live Demo

- Engineered a full-stack AI code-review platform with a **FastAPI** backend and **Google Gemini API**, supporting 7 languages and 5 issue categories via structured **JSON prompt engineering**.
- Built an animated 0–100 code-quality dashboard with 4 tabbed issue views in **React**, cutting manual review effort by an estimated **30%**.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering Aug 2022 – May 2026

Galgotias College of Engineering and Technology — *Greater Noida, India*

CORE COMPETENCIES

System Design • LLD • HLD • Distributed Systems • RESTful Microservices • Automation & ETL • Caching & Performance Optimization • Database Design • SOLID Principles • Clean Code • Unit & Integration Testing • PyTest • CI/CD • Agile/Scrum

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure – Certified Generative AI Professional, Mar 2025
- J.P. Morgan Software Engineering Virtual Experience, Oct 2025
- Hackathon Participant – Multiple Events, Jun 2026
