PROFESSIONAL EXPERIENCE

Software Developer Intern — AiBridze

Apr 2026 – Sep 2026

- Architected and developed modular backend services and **RESTful APIs** using **Python & FastAPI** for an AI chatbot platform, linking application logic to core data pipelines.
- Integrated and optimized **MongoDB** database models for conversation storage, ensuring reliable data persistence and low-latency queries across active sessions.
- Engineered automated data processing pipelines and backend scripts, reducing manual operational overhead by **35%** and boosting system throughput.
- Refactored existing codebase following **OOP principles** and clean architecture, resolving critical bugs to improve application reliability and maintainability.
- Collaborated with frontend and QA teams in an **Agile/Scrum** setup — participated in sprint planning, tested API contracts via **Postman**, and maintained version control using **Git/GitHub**.
- Implemented automated unit tests using **PyTest** and took part in **peer code reviews** to enforce high software quality and engineering standards.

Hackathon Participant — Multiple Events

Jun 2026

- Shipped **3+ full-stack prototypes** in 24–48 hours using **React, FastAPI, and Django**; secured top placements by solving real-world problems under time pressure.

TECHNICAL SKILLS

Frontend: React 18, React Native, Expo, Tailwind CSS, Responsive UI Design

Backend: Node.js, Express.js, FastAPI, Django, REST API Design, JWT Auth, Async/Await Architecture

Databases: MongoDB, PostgreSQL, Supabase, Mongoose, Database Design

Languages: Python, JavaScript, SQL, HTML5, CSS3

DevOps & Tools: Git, GitHub, Vercel, Render, MongoDB Atlas, CI/CD (EAS Build), Postman

PROJECTS

JobTrackr — MERN Stack, JWT Auth, REST APIs | [GitHub](#) • [Live Demo](#)

- Architected and built a production-ready **MERN** application (**React, Node.js/Express, MongoDB**) with **JWT authentication**, a drag-and-drop Kanban pipeline, and full **CRUD REST APIs** for end-to-end job-application tracking.
- Built a real-time analytics dashboard to track interview/offer rates across applications; deployed on **Vercel, Render**, and **MongoDB Atlas**.

AI Code Reviewer — FastAPI, React, Google Gemini API, Python | [GitHub](#) • [Live Demo](#)

- Engineered a full-stack AI code-review platform with a **FastAPI** backend and the **Google Gemini API**, supporting **7 languages** and **5 issue categories** via structured **JSON prompt engineering**.
- Built an animated 0–100 code-quality dashboard with 4 tabbed issue views in **React**, cutting manual review effort by an estimated **30%**.

Aurora — AI Health Companion App — React Native, Expo, Supabase, REST API | [GitHub](#) • [Live APK](#)

- Built a cross-platform health app (5+ modules: hydration, sleep, nutrition, habits) with **Supabase (PostgreSQL)** auth/storage, an AI health-prediction dashboard, and a production APK shipped via **EAS Build CI/CD**.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

Aug 2022 – May 2026

Galgotias College of Engineering and Technology

CORE COMPETENCIES

Full Stack Development • System Design • Scalable Application Development • Machine Learning • AI Engineering • DSA • OOP • Agile/Scrum • CI/CD • Version Control • Unit Testing • Code Review

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure – Certified Generative AI Professional, Mar 2025
- J.P. Morgan Software Engineering Virtual Experience (Forage), Oct 2025
- Career Essentials in Data Analysis – Microsoft & LinkedIn Learning, Jan 2025
- Selected as Technical Team Member – Google Developer Student Clubs (GDSC), Aug 2024
